

1. Print numbers from 1 to 50 divisible by 5

Program:

```
public class DivisibleBy5 {
```

```
    public static void main(String[] args) {
```

```
        for (int i = 1; i <= 50; i++) {
```

```
            if (i % 5 == 0) {
```

```
                System.out.println(i);
```

```
            }
```

```
        }
```

```
    }
```

```
}
```

O/P;

5

10

15

20

25

30

35

40

45

50

2. Count the odd numbers between 1 to 100

Program:

```
public class CountOddNumbers {
```

```
    public static void main(String[] args) {
```

```
int count = 0;
```

```
for (int i = 1; i <= 100; i++) {
```

```
    if (i % 2 != 0) {
```

```
        count++;
```

```
    }
```

```
}
```

```
    System.out.println("Count of odd numbers: " + count);
```

```
}
```

```
}
```

O/P:

Count of odd numbers: 50
